

Arjun Mehta

Seattle, WA | (206) 555-0148 | arjun.mehta@example.com | linkedin.com/in/arjunmehta

PROFESSIONAL SUMMARY

Software Engineer with 2+ years of experience building scalable backend services and customer-facing applications. Strong in Java, Python, AWS, distributed systems, data structures, and algorithmic problem solving. Experienced with REST APIs, microservices, CI/CD, and production debugging.

TECHNICAL SKILLS

Languages	Java, Python, C++, JavaScript, SQL
Backend	Spring Boot, REST APIs, Microservices, Kafka, Redis
Cloud & DevOps	AWS (EC2, S3, Lambda, DynamoDB, SQS), Docker, GitHub Actions
Databases	PostgreSQL, MySQL, DynamoDB
Core	Data Structures & Algorithms, OOP, System Design, Distributed Systems, Agile

PROFESSIONAL EXPERIENCE

Software Engineer — CloudCart Technologies | Seattle, WA | Jun 2024 – Present

- Developed Java/Spring Boot microservices supporting 2M+ monthly API requests with p95 latency below 180 ms.
- Designed an asynchronous order-processing workflow using Kafka and SQS, reducing peak request latency by 35%.
- Implemented Redis caching for high-read product APIs, decreasing database load by approximately 40%.
- Built automated CI/CD pipelines with GitHub Actions and Docker, reducing deployment time from 25 minutes to under 8 minutes.
- Investigated production incidents using CloudWatch logs and metrics and contributed fixes to improve service reliability.

Software Engineering Intern — Northstar Labs | Bellevue, WA | May 2023 – Aug 2023

- Built REST endpoints in Spring Boot for customer account and notification workflows.
- Created Python scripts for data validation and operational reporting, saving approximately 6 hours of manual work per week.
- Added unit and integration tests using JUnit and Mockito, increasing backend test coverage from 62% to 84%.

PROJECTS

Distributed URL Shortener — Java, Spring Boot, DynamoDB, Redis, AWS. Designed a horizontally scalable URL-shortening service with collision-resistant IDs, Redis caching, and DynamoDB persistence.

Price Alert Service — Python, AWS Lambda, SQS, DynamoDB. Built an event-driven service that processes product price updates and sends alerts through queued background workers.

EDUCATION

B.S. in Computer Science | University of Washington | 2024 | GPA: 3.7/4.0

CERTIFICATIONS

AWS Certified Developer – Associate | 2025
