

Emma Williams

Austin, TX | emma.williams@example.com | (737) 555-0116 | linkedin.com/in/emmawilliams

PROFILE

Software Engineer with 1+ year of professional experience and strong academic project experience. Skilled in Python, Java, AWS, SQL, and web development. Experienced in building APIs, automating workflows, writing tests, and working with agile engineering teams.

TECHNICAL SKILLS

Python • Java • JavaScript • SQL • C++ | Django • FastAPI • React • Spring Boot | AWS Lambda • S3 • EC2 • DynamoDB | PostgreSQL • MySQL | Pytest • JUnit • Git • Linux

EXPERIENCE

Software Engineer | Lone Star Software, Austin, TX | Jul 2025 – Present

- Develop Python services supporting customer account and notification workflows.
- Built REST APIs and background jobs for processing customer events asynchronously.
- Added Pytest coverage for critical business logic and reduced regression defects during releases.
- Created CloudWatch dashboards and alerts for application health and API failures.

Software Engineering Intern | Austin Digital Labs, Austin, TX | May 2024 – Aug 2024

- Built Spring Boot APIs and PostgreSQL queries for an internal inventory application.
- Developed React components and wrote unit tests for common administrative workflows.

SELECTED PROJECTS

Personal Finance Tracker — Python, Django, PostgreSQL. Built a web application for tracking expenses, budgets, recurring payments, and monthly summaries.

Serverless Image Processor — Python, AWS S3, Lambda. Created an event-triggered image-processing workflow using S3 and AWS Lambda.

EDUCATION

University of Texas at Austin | B.S. Computer Science | 2025 | GPA: 3.9/4.0

ADDITIONAL

Relevant Coursework: Data Structures, Algorithms, Cloud Computing, Database Systems, Software Engineering
